EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Philip Shipley on 8/15/06.

The application has been amended as follows:

SPECIFICATION

- On the amendment to the specification of 09/29/2003, on line 1, after "2002,"
-- now U.S. Patent 6,655,027, -- has been inserted.

CLAIMS

8. (currently amended) A dual ~~annual~~ annular combustor for a gas turbine engine, said combustor comprising a spectacle plate comprising an inner annulus and an outer annulus; and a plurality of ~~a pair~~ pairs of swirlers attached to said spectacle plate, each of said pair of swirlers comprises an inner swirler coupled to said inner annulus and an outer swirler coupled to said outer annulus, each said swirler comprising a pair of substantially parallel flats, wherein to assemble said combustor:

an assembly fixture is coupled to one pair of said swirlers, wherein said assembly fixture includes a plurality of arms that are sized to receive and align said flats of each

said swirler with respect to each other and an attachment portion that is configured to couple to said spectacle plate;

said assembly fixture is removably coupled to said spectacle plate to facilitate maintaining an alignment of each said swirler with respect to said spectacle plate;

each remaining swirler is then coupled to said spectacle plate; and

said assembly fixture is then uncoupled from said spectacle plate after each said swirler is attached to said spectacle plate; ~~and plate.~~

~~each remaining swirler is then coupled to said spectacle plate.~~

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the prior art of record do not fairly teach in permissible combination the claimed invention. The dual annular combustor is well known in the prior art as taught by e.g. Thompson et al (6,212,870) or Halila (5,353,587). Swirlers with flats are taught by Leen et al (6,453,671) but Leen is not in a dual annular combustor. The use of an assembly fixture for assembling the swirler is also known in the prior art, as previously established. However, the resultant claimed structure of the above amended claim 8 is to produce a product where the flats of each swirler of one pair of swirlers are aligned with respect to each other and there is no nexus in the prior art to arrive at this limitation. The amendment to the last line of claim 8, provides for the steps in the proper order.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
